

Course Organization

This course is organized into four major sections with each section corresponding to multiple competencies. Each section contains multiple modules. The modules are set up in a way that directs you to content elements from the course of study, primarily through the use of links.

Each key content element (including readings, videos, and knowledge checks) is indicated by a heading to make it quickly and easily identifiable. Take the time to visit each content element to support your learning as you progress through the sections, modules, and pages of the course.

Once you have completed the assignment, return to the course page and continue your progress. You may find that all activities included in the course are helpful for the final course assessment.
