

Reflect on Your Readiness

This module supported developing skills and competency in the following areas:

- explaining how ethical decision-making differs from legal decision-making in information technology
- identifying components of data access in information technology
- identifying professional codes of ethics relevant to IT professionals
- explaining how IT professionals consider ethical challenges related to professional codes of conduct
- explaining how personal bias influences technology
- identifying interventions to mitigate legal issues when given an ethics-based scenario

Ask yourself how capable you are of doing each task presented in Modules 11 and 12 in preparation for assessment. If you feel confident, then move to the next section. If you need more opportunity to explore the topic, try one or more of these strategies:

- Review content related to the topic. Some courses have an optional resource section with additional materials and activities.
- Use available activities provided in the learning resources.
- Identify the topics in the section that are challenging to you and make an appointment to speak with your instructor.
