

# Reflect on Your Readiness

This module supported developing skills and competency in the following areas:

- explaining the need for ethics within the field of information technology
- describing the main ethical frameworks that can be used for decision-making in information technology
- explaining how information technology professionals deal with ethical challenges related to data access
- identifying components of data privacy and data access in information technology
- determining where the sources of major data system breach threats exist
- detailing the purpose and value of professional ethics in guiding ethical decision-making in information technology

Ask yourself how capable you are of doing each task presented in Modules 1–3 in preparation for the assessment. If you feel confident, then move to the next section. If you need more opportunities to explore the topic, try one or more of these strategies:

- Review content related to the topic. Some courses have an optional resource section with additional materials and activities.
- Use available activities provided in the learning resources.
- Identify the topics in the section that are challenging to you and make an appointment to speak with your instructor.
