Ethics in Technology

Ethics of IT Organizations

You are employed by the company LearnCrunch. A need has been defined to manage development of a learning game to incorporate into new hire training. LearnCrunch has a training design and development team on staff; however, upper management is considering outsourcing the project to an offshore development firm to save up to half of the estimated project costs. Consider what additional information you may need in order to make a fully informed decision about which option to choose. What are the pros and cons of each option?

At the end of this module, you will be able to answer the following questions:

- What key legal and ethical issues are associated with the use of contingent workers, H-1B visa holders, and offshore outsourcing companies?
- What is whistleblowing, and what ethical issues are associated with it?
- What is green computing, and what are organizations doing to support this initiative?

Chapter 10: "Ethics of IT Organizations"

Passential Question:

How do I determine if an organization follows ethical rules?
