Ethics in Technology

Course Summary

Congratulations! You have completed all of the coursework for Ethics in Technology. By completing this course, you have developed the skills necessary to examine the ethical considerations present in technology today, including privacy, accuracy, access, and security. As you take on different technological roles, you will be able to assess and address professional challenges in a way that complies with ethical tenets.

Next Steps

Prior to taking the final assessment, it is recommended that you

- review each section's Reflect on Your Readiness statements located under the Section Summary to guide your review of key points,

- leverage course-related resources and activities (if applicable), and

- gain clarity on any topics within the course by engaging your instructor.
