Ethics in Technology

Building Employability and Competency

To explore the ethical implications of your role in a technology field, you will need to be able to

- identify the different ways to securely transmit data, and

- determine compliance of national and international consumer data protection and privacy regulations in a given scenario.

In this course, you can demonstrate these skills by passing a final assessment that measures whether you have mastered the following competency:

- **Competency 1020.2.2: Describes Ethical Issues in Data.** The learner describes ethical issues regarding data privacy, accuracy, access, and security.
